Bottle Alley Glass
Recycled Glass Innovation

DECORATIVE LIGHT PANELS

Bottle Alley Glass's recycled glass bottle surfaces are unique and individual, made by crushing waste glass bottles that are then fused in energy efficient kilns to produce an eco-friendly solid surface.

Perfect for fabrication using traditional and modern stone masonry skills, our sustainable material enhances your cradle to cradle credentials without compromising your quality.

We have a vast colour pallet with traditional bottle colours and special edition tones depending on the feed stock available.

Bottle Alley Glass Unit 708, Thorp Arch Estate,
