

Ska rating is a RICS-Lead and owned environmental assessment tool for sustainable fit-outs. It is estimated that a building may have 30-40 fit-outs in its lifetime, so it's vital the process is as sustainable as possible.

**Bottle Alley Glass manufacture sheets of fused and art glass that is made from Recycled Glass Bottles. The glass sheets fit within the SKA scheme in the following ways:**

- They are made from 100% recycled content (recycled glass bottles)
- They are 100% recyclable after use (the glass can be melted down and made into new glass)
- Fusing waste glass produces zero CO2 emissions.
- They qualify as a 'Quick Fix' under the SKA scheme.
- They benefit both the Retail and Office schemes.

**Brand Name:** Bottle Alley Glass Recycled Glass Sheets

**Production description and application:**

Bottle Alley Glass Recycled Glass Sheets, 6mm, 10mm, 12mm, 15mm and 20mm thick are pure fused recycled bottle glass sheets suitable for use as worktops, splash backs, tiles, lighting panels, bespoke furniture and other decorative glass sheets.

**Calculation of Recycled Content**

Recycled material used	A	B	C	D	Reason for inclusion
Pre-Consumer waste bottles				✓	Consistency
Post-Consumer waste bottles	✓				Colour variation

**Calculation tables**

The yield factor reflects the % decrease in mass of the input during the manufacturing process due to wastage, moisture reduction etc.

Recycled material used	Input tonnes	Yield %	Input x Yield tonnes	Reason
Pre-Consumer waste bottles	0.90*	100	0.90	No waste
Post-Consumer waste bottles	0.10*	100	0.10	No waste
Total Recycled input per tonne of final product			1	No waste
<b>Recycled Content %</b>			<b>100%</b>	No waste

\*Pre and Post consumer mix varies according to client requirements
